

TINKER SATURDAY

Exploring Avenues for Young Innovators

TINKER SATURDAY

Introduction

Overview

Innovation in education encourages students and teachers to research, explore, and use all the tools to uncover something new. Innovation involves a different way of looking at problems and solving them. It also improves education because it compels students to use a higher level of thinking to solve complex problems. Innovation does not just mean the use of technology or new inventions, though these can contribute to innovation.

Innovation involves a new way of thinking, thereby helping students develop their creativity and problem-solving skills. Innovation cannot be tested or graded, but it can be inculcated and built up in students. In this environment of high-stakes testing, it can be incredibly difficult to introduce innovation and creativity in the classroom.

In continuation with several efforts to make science learning more hands-on and experiential, the **Atal Innovation Mission (AIM)** launched by NITI Aayog under the leadership of Prime Minister Narendra Modi has emerged as a powerful nationwide initiative primarily promoting a culture of innovation and entrepreneurship. AIM tries to accelerate these traits among school children through its tinkering labs – the Atal Tinkering Labs (ATLs).

ATAL INNOVATION MISSION

So, what is Tinkering? Remember your childhood, when you used to disrupt your toy car, pull out its key, motor, and gears and check how it worked. You might have put it in water to check if it still works. That was when you 'tinkered' for the first time in your life and undoubtedly you would have got scolded by your parents for breaking toys. Unfortunately, such 'tinkering' also faded from our school science labs. What students need is time and freedom to explore and experiment with manipulative, and at least create something out of it. It not only sparks their creativity but boosts them to innovate.

Tinker Saturday

Atal Incubation Centre – Nalanda Institute of Technology Foundation (AIC-Nalanda), being supported by Atal Innovation Mission as an AIC is also a part of the AIM family and has designed a bridging program of “**Tinker Saturday**” with the ATLs in Bhubaneswar, Odisha to have a deep engagement within the AIC-ATL network where students from ATLs get an opportunity to

enhance their innovative capabilities beyond the ATLs by exploring the resources, facilities and services available at AIC-Nalanda. Atal Incubation Centre- Nalanda aims to weave this large innovation network into the fabric of the entrepreneurial ecosystem and thus, taking a step forward to engage deeply with some of the ATLs in Bhubaneswar as a pilot program towards a greater vision for the entire state in near future.

This ambitious program of "Tinker Saturday" is an engaging day-long visit of 20-25 students from an ATL School to AIC-Nalanda and explore the in-house resources along a few program tracks. The students will get an opportunity to spend a day in the Fab Lab & other labs at AIC, interact with startups, engage in play activities on IP, participate in a mini Idea Pitch competition and much more.

The prime objective of this program is to create and nurture an innovation ecosystem at school level and connecting the same with entrepreneurial activities in near future. This shall also enable AIC to build its second in-line generation of innovators and startups. Such engagements shall also ensure a wider participation of young minds in various initiatives of AIC-Nalanda.

Program Tracks at Tinker Saturday

Tinker Saturday is organized and hosted by the Fab Lab wing of AIC-Nalanda. The Fab Lab at AIC-Nalanda is a state-of-the-art Makerspace for young tinkerers and innovators to develop their prototype and testing facilities in the sectors of additive manufacturing, Internet of things, UAVs, Cutting and machining, etc. (<https://fablab.aicnitf.in/>)

AIC-Nalanda invites one of the ATL Schools in Bhubaneswar to the incubation centre every Saturday with 25-30 students selected by the school itself from the class of 8-10 for spending a complete day at AIC-Nalanda (10.00 am to 4.00 pm). The visit is not mere a showcase or interaction event but a structured engaging activity with various tracks and objectives. This includes:

 <h3>I-Yantra Session</h3> <ul style="list-style-type: none"> • Concept and Definition of the Internet of Things (IOT) • IOT Architecture & major components 	 <h3>Tech Talks</h3> <h4>Listen to Expert</h4> <ul style="list-style-type: none"> • Activity on IP and Innovation • Starting a Startup
 <h3>Tech-ride Demonstration</h3> <ul style="list-style-type: none"> • UAV • AR-VR • Additive Manufacturing 	 <h3>Idea Blazon</h3> <h4>Innovator Pitch</h4> <ul style="list-style-type: none"> • Idea Pitching • Product Showcase • Exciting Prizes to be won

Launching of the Program

AIC-Nalanda had the privileged opportunity to launch and inaugurate the first chapter of Tinker Saturday on 25th June, 2022 in the presence of a delegation from the AIM Team that comprised of Mr Rohit Gupta, Program Director; Mr Pitambar Sahoo, Administration Head; Mr Shubham Gupta, Innovation Lead; Mr Ranjan Das, Innovation Lead and Mr Rajeev Kumar, Young Professional, AIM, NITI Aayog.

The Program that started with Welcome Address from Mr Devjyoti Mohanty, CEO, AIC-Nalanda also had brief addresses from Mr Rohit Gupta and Mr Shubham Gupta who explained the objectives of Atal Innovation Mission and applauded the efforts of AIC-Nalanda for strengthening the innovation & entrepreneurship network in its region. Twelve ATL-In Charge from various schools in the city also attended the inaugural program and had extensive discussions with the AIM Team as well.
